

I wanted to write to you about the current FCC proposal to expand the Low Power FM broadcast service. I understand that if the FCC does expand this service it will take priority over certain stations which broadcast via the FM translator service. I want to strongly recommend that you do not implement the LPFM proposal because in doing so it may likely eliminate the ability of the K-Love radio broadcast to air in my area. K-Love provides me with the best music choice for my family to listen to as it is commercial free and has a very positive impact for my wife and children. Should K-Love be taken off the air as a result of the LPFM stations, the impact would be detrimental to many of the community gatherings that my family attends, especially the music pavilions held at the county fairs. Often times these music pavilions are a wonderful source for the community to share some good positive music and discuss the events that K-Love promotes. This positive atmosphere is without a doubt beneficial to the community members that I interact with and is in the public's best interest to maintain the K-Love broadcast in my area of Ohio. Please feel free to contact me at the above mailing address if you wish to discuss this further. I strongly encourage you to dismiss any proposals that expand LPFM stations such that they impact current FM translator service.

Sincerely Vincent M. Petrella
